

RTMDx is powerful software that makes **Risk Terrain Modeling (RTM)** easy. Produce reports and maps that inform decision-making and help you solve problems. See www.rtmdx.com for details.

RTMDx software is available from the Rutgers Center on Public Security (RCPS) by subscription to the **RTM Training and Continuing Education Program**. This gets you up-and-running quickly to start analyzing and mitigating spatial risks with the latest upgrades and best practices for Risk Terrain Modeling. Subscriptions are activated on a rolling basis.

Annual Subscription Pricing			
RTM Training and Continuing Education Program pricing options are based on use-cases and RTMDx software configurations. Every option includes cloud-based subscription to RTMDx, harnessing super computers for fast, secure and reliable analysis wherever and whenever you need it; Personalized login credentials, Plus...

RTMDx software was developed by RCPS with grants from the U.S. Department of Justice, National Institute of Justice (NIJ) and Rutgers University. It is managed and maintained by RCPS with proceeds from subscriptions. The prices reflect a commitment to sustainably offer RTMDx as an evidence-based and high quality tool for researchers and practitioners.
